

Store: Spatial Data Store – Open 24-7

Spatial Data Store

The **Valtus Spatial Data Store** allows you to find and order the imagery and LiDAR data you need...exactly how you need it.

Ordering Imagery:

When ordering aerial imagery, you can define the search method, projection, coordinate system, resolution and output file format. Within minutes – and to your exact specifications – Valtus will deliver the final product, which you can easily retrieve from our FTP site.

Ordering LiDAR:

You can order LiDAR data by selecting pre-defined 2 x 2 kilometer tiles or by uploading a shapefile. Once you have defined the data required for your area of interest, simply specify your desired output grid format and surface type, or choose to order a completed hillshade. As with imagery purchases, Valtus processes your order according to your specifications and delivers it to our FTP site for retrieval...all within minutes.

Valtus Imagery & LiDAR Library:

- ▶ High resolution digital aerial photography
- ▶ Satellite imagery – DigitalGlobe, LandSat 7
- ▶ Extensive imagery coverage in Canada and the United States
- ▶ 400,000+ square kilometers of LiDAR in Western Canada
- ▶ Additional content added on a frequent and consistent basis
- ▶ Order by tile or by uploading a shapefile
- ▶ Full access account and user administration tools

Gain Access to the Spatial Data Store:

The Valtus online store operates on a per transaction basis. You may purchase imagery and/or LiDAR data by credit card or apply for a Valtus Business Account. Visit the Spatial Data Store today at www.valtus.com or for more information, please contact the reselling partner listed below.
